

org.xml.sax.helpers.* Support

Deprecated: Parser, DocumentHandler, HandlerBase, AttributeList, org.xml.sax.helpers.AttributeListImpl, org.xml.sax.helpers.ParserFactory.

Not Shown:

org.xml.sax.helpers.ParserAdapter (Adapts a SAX1 Parser to a SAX2 XMLReader)
org.xml.sax.helpers.XMLReaderAdapter (Adapts a SAX2 XMLReader as a SAX1 Parser)

org.xml.sax.helpers. XMLReaderFactory
XMLReader createXMLReader () ↴
XMLReader createXMLReader (String className) ↴

Locator
int getColumnNumber ()
int getLineNumber ()
String getPublicId ()
String getSystemId ()

org.xml.sax.helpers. LocatorImpl
LocatorImpl ()
LocatorImpl (Locator locator)

Attributes
int getIndex (String qName)
int getIndex (String uri, String localName)
int getLength ()
String getLocalName (int index)
String getQName (int index)
String getUri (int index)
String getType (String qName)
String getType (String uri, String localName)
String getURI (int index)
String getUri (int index)
String getQName (String qName)
String getUri (String uri, String localName)

org.xml.sax.helpers. AttributesImpl
AttributesImpl ()
AttributesImpl (Attributes atts)
Accessors
void setAttribute (int index, String uri, String localName, String qName, String type, String value)
void setAttributes (Attributes atts)
Collectors
void addAttribute (String uri, String localName, String qName, String type, String value)
void removeAttribute (int index)
Other Public Methods
void clear ()

InputSource
InputSource ()
InputSource (String systemId)
InputSource (InputStream inputStream)
InputSource (Reader characterStream)
InputStream get / setInputStream ()
Reader get / setCharacterStream ()
String get / setEncoding ()
String get / setPublicId ()
String get / setSystemId ()

org.xml.sax.ext. DecHandler
void attributeDecl (String eName, String type, String valueDefault, String value) ↴
void elementDecl (String name, String model) ↴
void externalEntityDecl (String name, String publicId, String systemId) ↴
void internalEntityDecl (String name, String value) ↴

org.xml.sax.helpers. NamespaceSupport
NamespaceSupport ()
Accessors
Enumeration getDeclaredPrefixes ()
String getPrefix (String uri)
Enumeration getPrefixes ()
Enumeration getPrefixes (String uri)
String getURI (String prefix)
Other Public Methods
boolean declarePrefix (String prefix, String uri)
void popContext ()
String[] processName (String qName, String parts[], boolean isAttribute)
void pushContext ()
void reset ()
String XMLNS
