MenuComponent

not shown is the interface javax.accessibility.Accessible

Serializable

MenuComponent

MenuComponent () ↴
Accessors + Collectors
AccessibleContext getAccessibleContext ()
Font get / setFont ()
String get / setName ()
MenuComponent getParent ()
Object getTreeLock ()
void removeNotify ()
Event Methods
void dispatchEvent (AWTEvent e)
void processEvent (AWTEvent e)
Object
String toString ()
Other Protected Methods
String paramString ()

Accessible

javax.accessibility.Accessible

MenuContainer

Font getFont ()
void remove (MenuComponent comp)

MenuItem

MenuItem () ↴
MenuItem (String label) ↴
MenuItem (String label, MenuShortcut s) ↴
Accessors
AccessibleContext getAccessibleContext ()
String get / setActionCommand ()
String get / setLabel ()
MenuShortcut get / setShortcut ()
boolean is / setEnabled ()
Collectors
void addNotify ()
void deleteShortcut ()
Event Methods
void add / removeActionListener (ActionListener l)
void disableEvents (long eventsToDisable)
void enableEvents (long eventsToEnable)
ActionListener[] getActionListeners ()
EventListener[] getListeners (Class listenerType)
void processActionEvent (ActionEvent e)
void processEvent (AWTEvent e)
Other Public Methods
String paramString ()

MenuBar

MenuBar () ↴
Accessors
AccessibleContext getAccessibleContext ()
Menu get / setHelpMenu ()
Menu getMenu (int i)
int getMenuCount ()
MenuItem getMenuItem (MenuItemShortcut s)
Collectors
Menu add (Menu m)
void add / removeNotify ()
void deleteShortcut (MenuItemShortcut s)
void remove (int index)
void remove (MenuComponent m)
Other Public Methods
Enumeration shortcuts ()

Component

MenuContainer

Font getFont ()
void remove (MenuComponent comp)

Menu

Menu () ↴
Menu (String label) ↴
Menu (String label, boolean tearOff) ↴
Accessors
AccessibleContext getAccessibleContext ()
MenuItem getItem (int index)
int getItemCount ()
boolean isTearOff ()
Collectors
MenuItem add (MenuItem mi)
void add (String label)
void add / removeNotify ()
void addSeparator ()
void insert (MenuItem menuItem, int index)
void insert (String label, int index)
void insertSeparator (int index)
void remove (int index)
void remove (MenuComponent item)
void removeAll ()
Other Public Methods
String paramString ()

ItemSelectable

Accessors
Object[] getSelectedObjects ()
Event Methods
void add / removeItemListener (ItemListener l)

CheckboxMenuItem

CheckboxMenuItem () ↴
CheckboxMenuItem (String label) ↴
CheckboxMenuItem (String label, boolean state) ↴
Accessors + Collectors
AccessibleContext getAccessibleContext ()
Object[] getSelectedObjects ()
boolean get / setState ()
void addNotify ()
Event Methods
void add / removeItemListener (ItemListener l)
ItemListener[] getItemListeners ()
