

javax.swing.undo.*

Methods declared in supertypes are hidden in subtypes

UndoableEditSupport

UndoableEditSupport (Object r)

Accessors

int getUpdateLevel ()

Event Methods

void add / removeUndoableEditListener (UndoableEditListener l)

UndoableEditListener[] getUndoableEditListeners ()

Object

String toString ()

Other Public Methods

void beginUpdate ()

void endUpdate ()

void postEdit (UndoableEdit e)

Other Protected Methods

void _postEdit (UndoableEdit e)

CompoundEdit createCompoundEdit ()

UndoableEdit

Accessors + Collectors

String getPresentationName ()

String getRedoPresentationName ()

String getUndoPresentationName ()

boolean isSignificant ()

boolean addEdit (UndoableEdit anEdit)

Other Public Methods

boolean canRedo ()

boolean canUndo ()

void die ()

void redo () ↴

boolean replaceEdit (UndoableEdit anEdit)

void undo () ↴

AbstractUndoableEdit

AbstractUndoableEdit ()

String toString ()

DocumentEvent.ElementChange

Element[] getChildrenAdded ()

Element[] getChildrenRemoved ()

Element getElement ()

int getIndex ()

Serializable

EventObject

UndoableEditEvent

UndoableEditEvent (Object source, UndoableEdit edit)

UndoableEdit getEdit ()

EventListener

UndoableEditListener

UndoableEditListener (UndoableEditEvent e)

void undoableEditHappened (UndoableEditEvent e)

CompoundEdit

CompoundEdit ()

Accessors

boolean isInProgress ()

void end ()

UndoableEdit lastEdit ()

Other Methods

StateEdit

StateEdit (StateEditable anObject)

StateEdit (StateEditable anObject, String name)

Collectors

void removeRedundantState ()

Other Methods

void end ()

void init (StateEditable anObject, String name)

AttributeUndoableEdit

AttributeUndoableEdit (Element element, AttributeSet newAttributes, boolean isReplacing)

AbstractDocument.ElementEdit

ElementEdit (Element e, int index, Element[] removed, Element[] added)

StateEditable

void restoreState (Hashable state)

void storeState (Hashable state)

String RCSID

UndoManager

UndoManager ()

Accessors

int get / setLimit ()

String getUndoOrRedoPresentationName ()

Other Public Methods

boolean canUndoOrRedo ()

void discardAllEdits ()

void undoOrRedo () ↴

Other Protected Methods

UndoableEdit editToBeRedone ()

UndoableEdit editToBeUndone ()

redoTo (UndoableEdit edit) ↴

trimEdits (int from, int to)

trimForLimit ()

undoTo (UndoableEdit edit) ↴

DocumentEvent

ElementChange getChange (Element elem)

Document getDocument ()

int getLength ()

int getOffset ()

EventType getEventType ()

interface ElementChange

class EventType

AbstractDocument.DefaultDocumentEvent

DefaultDocumentEvent (int offs, int len, DocumentEvent EventType type)
