

# java.applet.\*

**AppletContext**

Accessors

Applet getApplet (String name)

Enumeration getApplets ()

AudioClip getAudioClip (URL url)

Image getImage (URL url)

InputStream getStream (String key)

Iterator getStreamKeys ()

void setStream (String key, InputStream stream) ↴

Other Public Methods

void showDocument (URL url)

void showDocument (URL url, String target)

void showStatus (String status)

**AudioClip**

void loop ()

void play ()

void stop ()

**Applet**

**Applet () ↴**

Static Methods

AudioClip **newAudioClip** (URL url)

Accessors

AccessibleContext getAccessibleContext()

AppletContext getAppletContext ()

String getAppletInfo ()

AudioClip getAudioClip (URL url)

AudioClip getAudioClip (URL url, String name)

URL getCodeBase ()

URL getDocumentBase ()

Image getImage (URL url)

Image getImage (URL url, String name)

Locale getLocale ()

String getParameter (String name)

String[] getParameterInfo ()

boolean isActive ()

void setStub (AppletStub stub)

Other Public Methods

void destroy ()

void init ()

void play (URL url)

void play (URL url, String name)

void resize (Dimension d)

void resize (int width, int height)

void showStatus (String msg)

void start ()

void stop ()

**RootPaneContainer**

javax.swing.

**JApplet**

**JApplet () ↴**

Accessors

AccessibleContext getAccessibleContext()

Container get / setContentPane ()

Component get / setGlassPane ()

JMenuBar get / setMenuBar ()

JLayeredPane get / setLayeredPane ()

JRootPane getRootPane ()

boolean is / setRootPaneCheckingEnabled()

void setLayout (LayoutManager manager)

void setRootPane (JRootPane root)

Collectors

void addImpl (Component comp, Object constraints, int index)

void remove (Component comp)

Other Methods

void update (Graphics g)

JRootPane createRootPane ()

String paramString ()
