

java.text.*

Collator

Methods declared in supertypes are hidden in subtypes

Comparator

Object

boolean equals (Object obj)

Other Public Methods

int compare (Object o1, Object o2)

Cloneable

Collator

Collator ()

Static Methods

Locale[] getAvailableLocales ()

Collator getInstance ()

Collator getInstance (Locale desiredLocale)

Accessors

CollationKey getCollationKey (String source)

int get / setDecomposition ()

int get / setStrength ()

Object

Object clone ()

int hashCode ()

Other Public Methods

int compare (String source, String target)

boolean equals (String source, String target)

int PRIMARY, SECONDARY, TERTIARY, IDENTICAL, NO_DECOMPOSITION, CANONICAL_DECOMPOSITION, FULL_DECOMPOSITION

RuleBasedCollator

RuleBasedCollator (String rules)

CollationElementIterator getCollationElementIterator (String source)

CollationElementIterator getCollationElementIterator (CharacterIterator source)

String getRules ()

Comparable

CollationKey

Accessors

String getSourceString ()

Object

boolean equals (Object target)

int hashCode ()

Other Public Methods

int compareTo (CollationKey target)

byte[] toByteArray ()

CollationElementIterator

Static Methods

int primaryOrder (int order)

short secondaryOrder (int order)

short tertiaryOrder (int order)

Accessors

int getMaxExpansion (int order)

int get / setOffset ()

void setText (String source)

void setText (CharacterIterator source)

Other Public Methods

int next ()

int previous ()

void reset ()

int NULLORDER
