

javax.print.attribute.* Syntax

 Cloneable

 Serializable

TextSyntax (String value, Locale locale)

Accessors

Locale **getLocale** ()

String **getValue** ()

Object

boolean **equals** (Object object)

int **hashCode** ()

String **toString** ()

 Cloneable

 Serializable

URISyntax (URI uri)

Accessors

URI **getURI** ()

Object

boolean **equals** (Object object)

int **hashCode** ()

String **toString** ()

 Cloneable

 Serializable

DateTimeSyntax (Date value)

Accessors

Date **getValue** ()

Object

boolean **equals** (Object object)

int **hashCode** ()

String **toString** ()

 Cloneable

 Serializable

EnumSyntax (int value)

Accessors

EnumSyntax[] **getEnumValueTable** ()

int **getOffset** ()

String[] **getStringTable** ()

int **getValue** ()

Object

Object **clone** ()

int **hashCode** ()

String **toString** ()

Other Protected Methods

Object **readResolve** () ↴

 Cloneable

 Serializable

IntegerSyntax (int value)

IntegerSyntax (int value, int lowerBound, int upperBound)

Accessors

int **getValue** ()

Object

boolean **equals** (Object object)

int **hashCode** ()

String **toString** ()

 Cloneable

 Serializable

SetOfIntegerSyntax (String members)

SetOfIntegerSyntax (int[] members)

SetOfIntegerSyntax (int member)

SetOfIntegerSyntax (int lowerBound, int upperBound)

Accessors

int[] **getMembers** ()

Object

boolean **equals** (Object object)

int **hashCode** ()

String **toString** ()

Other Public Methods

boolean **contains** (int x)

boolean **contains** (IntegerSyntax attribute)

int **next** (int x)

 Cloneable

 Serializable

ResolutionSyntax (int crossFeedResolution, int feedResolution, int units)

Accessors

int **getCrossFeedResolution** (int units)

int **getCrossFeedResolutionDphi** ()

int **getFeedResolution** (int units)

int **getFeedResolutionDphi** ()

int[] **getResolution** (int units)

Object

boolean **equals** (Object object)

int **hashCode** ()

String **toString** ()

Other Public Methods

boolean **lessThanOrEqualTo** (ResolutionSyntax other)

String **toString** (int units, String unitsName)

int **DPI**, **DPCM**

 Cloneable

 Serializable

Size2DSyntax (float x, float y, int units)

Size2DSyntax (int x, int y, int units)

Accessors

float[] **getSize** (int units)

float **getX** (int units)

int **getXMicrometers** ()

float **getY** (int units)

int **getYMicrometers** ()

Object

boolean **equals** (Object object)

int **hashCode** ()

String **toString** ()

Other Public Methods

String **toString** (int units, String unitsName)

int **INCH**, **MM**
