

javax.print.attribute.* Syntax

 **Cloneable**

 **Serializable**

 **TextSyntax**

TextSyntax (String value, Locale locale)

Accessors

Locale getLocale ()

String getValue ()

Object

boolean equals (Object object)

int hashCode ()

String toString ()

 **Cloneable**

 **Serializable**

 **URISyntax**

URISyntax (URI uri)

Accessors

URI getURI ()

Object

boolean equals (Object object)

int hashCode ()

String toString ()

 **Cloneable**

 **Serializable**

 **DateTimeSyntax**

DateTimeSyntax (Date value)

Accessors

Date getValue ()

Object

boolean equals (Object object)

int hashCode ()

String toString ()

 **Cloneable**

 **Serializable**

 **IntegerSyntax**

IntegerSyntax (int value)

IntegerSyntax (int value, int lowerBound, int upperBound)

Accessors

int getValue ()

Object

boolean equals (Object object)

int hashCode ()

String toString ()

 **Cloneable**

 **Serializable**

 **SetOfIntegerSyntax**

SetOfIntegerSyntax (String members)

SetOfIntegerSyntax (int[] members)

SetOfIntegerSyntax (int member)

SetOfIntegerSyntax (int lowerBound, int upperBound)

Accessors

int[] getMembers ()

Object

boolean equals (Object object)

int hashCode ()

String toString ()

Other Public Methods

boolean contains (int x)

boolean contains (IntegerSyntax attribute)

int next (int x)

 **Cloneable**

 **Serializable**

 **ResolutionSyntax**

ResolutionSyntax (int crossFeedResolution, int feedResolution, int units)

Accessors

int getCrossFeedResolution (int units)

int getCrossFeedResolutionDphi ()

int getFeedResolution (int units)

int getFeedResolutionDphi ()

int[] getResolution (int units)

Object

boolean equals (Object object)

int hashCode ()

String toString ()

Other Public Methods

boolean lessThanOrEquals (ResolutionSyntax other)

String toString (int units, String unitsName)

int DPI, DPCM

 **Cloneable**

 **Serializable**

 **Size2DSyntax**

Size2DSyntax (float x, float y, int units)

Size2DSyntax (int x, int y, int units)

Accessors

float[] getSize (int units)

float getX (int units)

int getXMicrometers ()

float getY (int units)

int getYMicrometers ()

Object

boolean equals (Object object)

int hashCode ()

String toString ()

Other Public Methods

String toString (int units, String unitsName)

int INCH, MM

 **Cloneable**

 **Serializable**

 **EnumSyntax**

EnumSyntax (int value)

Accessors

EnumSyntax[] getEnumValueTable ()

int getOffset ()

String[] getStringTable ()

int getValue ()

Object

Object clone ()

int hashCode ()

String toString ()

Other Protected Methods

Object readResolve () ↴
