

## javax.xml.parsers.\*

### SAXParserFactory

# SAXParserFactory ()

Static Methods

SAXParserFactory **newInstance** ()

Accessors

boolean **get** / **setFeature** (String name)

boolean **is** / **setNamespaceAware** ()

boolean **is** / **setValidating** ()

Other Public Methods

SAXParser **newSAXParser** ()

### SAXParser

# SAXParser ()

Accessors

org.xml.sax.Parser **getParser** ()

Object **get** / **setProperty** (String name)

org.xml.sax.XMLReader **getXMLReader** ()

boolean **isNamespaceAware** ()

boolean **isValidating** ()

Other Public Methods

void **parse** (InputStream is, HandlerBase hb)

void **parse** (InputStream is, DefaultHandler dh)

void **parse** (String uri, HandlerBase hb)

void **parse** (String uri, DefaultHandler dh)

void **parse** (File f, HandlerBase hb)

void **parse** (File f, DefaultHandler dh)

void **parse** (InputStream is, HandlerBase hb)

void **parse** (InputStream is, DefaultHandler dh)

void **parse** (InputStream is, HandlerBase hb, String systemId)

void **parse** (InputStream is, DefaultHandler dh, String systemId)

### DocumentBuilderFactory

# DocumentBuilderFactory ()

Static Methods

DocumentBuilderFactory **newInstance** ()

Accessors

Object **get** / **setAttribute** (String name)

boolean **is** / **setCoalescing** ()

boolean **is** / **setExpandEntityReferences** ()

boolean **is** / **setIgnoringComments** ()

boolean **is** / **setIgnoringElementContentWhitespace** ()

boolean **is** / **setNamespaceAware** ()

boolean **is** / **setValidating** ()

Other Public Methods

DocumentBuilder **newDocumentBuilder** ()

### DocumentBuilder

# DocumentBuilder ()

Accessors

DOMImplementation **getDOMImplementation** ()

boolean **isNamespaceAware** ()

boolean **isValidating** ()

void **setEntityResolver** (org.xml.sax.EntityResolver er)

void **setErrorHandler** (org.xml.sax.ErrorHandler eh)

Other Public Methods

Document **newDocument** ()

Document **parse** (InputStream is)

Document **parse** (String uri)

Document **parse** (File f)

Document **parse** (InputStream is)

Document **parse** (InputStream is, String systemId)
