java.awt.*
MenuComponent

not shown is the interface javax.accessibility.Accessible

Serializable

MenuComponent
MenuComponent ()

Accessors + Collectors
AccessibleContext getAccessibleContext ()
Font get / setFont ()
String get / setName ()
MenuContainer getParent ()
Object getTreeLock ()
void removeNotify ()

Event Methods
void dispatchEvent (AWTEvent e)
void processEvent (AWTEvent e)

Object
String toString ()

Other Protected Methods
String paramString ()

MenuItem
MenuItem ()
MenuItem (String label)
MenuItem (String label, MenuShortcut s)

Accessors
AccessibleContext getAccessibleContext ()
String get / setActionCommand ()
String get / setLabel ()
MenuShortcut get / setShortcut ()
boolean is / setEnabled ()

Collectors
void addNotify ()
void deleteShortcut ()

void add / removeActionListener (ActionListener l)
void disableEvents (long eventsToDisable)
void enableEvents (long eventsToEnable)
ActionListener[] getActionListeners ()
EventListener[] getListeners (Class listenerType)
void processActionEvent (ActionEvent e)
void processEvent (AWTEvent e)

Other Public Methods
String paramString ()

MenuContainer
Font getFont ()
void remove (MenuComponent comp)

Menu
Menu ()
Menu (String label)
Menu (String label, boolean tearOff)

Accessors
AccessibleContext getAccessibleContext ()
MenuItem getItem (int index)
int getItemCount ()
boolean isTearOff ()

Collectors
MenuItem add (MenuItem mi)
void add (String label)
void add / removeNotify ()
void addSeparator ()
void insert (MenuItem menuitem, int index)
void insert (String label, int index)
void insertSeparator (int index)
void remove (int index)
void remove (MenuComponent item)
void removeAll ()

Other Public Methods
String paramString ()

PopupMenu
PopupMenu ()
PopupMenu (String label)

Accessors + Collectors
AccessibleContext getAccessibleContext ()
void addNotify ()

Other Public Methods
void show (Component origin, int x, int y)

ItemSelectable
Accessors
Object[] getSelectedObjects ()
Event Methods
void add / removeItemListener (ItemListener l)

CheckboxMenuItem
CheckboxMenuItem ()
CheckboxMenuItem (String label)
CheckboxMenuItem (String label, boolean state)

Accessors + Collectors
AccessibleContext getAccessibleContext ()
Object[] getSelectedObjects ()
boolean get / setState ()
void addNotify ()

Event Methods
void add / removeItemListener (ItemListener l)
ItemListener[] getItemListeners ()
EventListener[] getListeners (Class listenerType)
void processEvent (AWTEvent e)
void processItemEvent (ItemEvent e)

Other Public Methods
String paramString ()

MenuBar
MenuBar ()

Accessors
AccessibleContext getAccessibleContext ()
Menu get / setHelpMenu ()
Menu getMenu (int i)
int getMenuCount ()
MenuItem getShortcutMenuItem (MenuShortcut s)

Collectors
Menu add (Menu m)
void add / removeNotify ()
void deleteShortcut (MenuShortcut s)
void remove (int index)
void remove (MenuComponent m)

Other Public Methods
Enumeration shortcuts ()
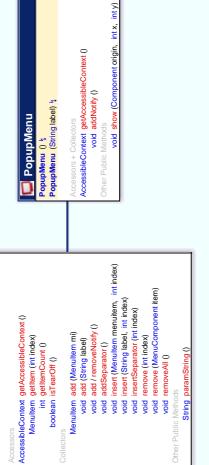

Serializable

MenuShortcut
MenuShortcut (int key)
MenuShortcut (int key, boolean useShiftModifier)

Accessors
int getKey ()

Object
boolean equals (MenuShortcut s)
boolean equals (Object obj)
int hashCode ()
String toString ()

Other Methods
boolean usesShiftModifier ()
String paramString ()

Accessible
javax.accessibility.

Component

MenuContainer
Font getFont ()
void remove (MenuComponent comp)
