javax.naming.event.*

NamingListener

void namingExceptionThrown (NamingExceptionEvent evt)

java.util. **_EventListener_**

NamespaceChangeListener

void objectAdded (NamingEvent evt)
void objectRemoved (NamingEvent evt)
void objectRenamed (NamingEvent evt)

ObjectChangeListener

void objectChanged (NamingEvent evt)

javax.naming.ldap. **_UnsolicitedNotificationListener_**

void notificationReceived (UnsolicitedNotificationEvent evt)

NamingEvent (EventContext source, int type, Binding newBd, Binding oldBd, Object changeInfo)

Accessors
    Object getChangeInfo ()
    Binding getNewBinding ()
    Binding getOldBinding ()
    int getType ()
Event Methods
    void dispatch (NamingListener listener)
EventContext getEventContext ()

int OBJECT_ADDED, OBJECT_REMOVED, OBJECT_RENAMED, OBJECT_CHANGED

NamingExceptionEvent (EventContext source, NamingException exc)

Accessors
NamingException getException ()
Event Methods
    void dispatch (NamingListener listener)
EventContext getEventContext ()

javax.naming.ldap. **UnsolicitedNotificationEvent**

UnsolicitedNotificationEvent (Object src, UnsolicitedNotification notice)

Accessors
UnsolicitedNotification getNotification ()
Event Methods
    void dispatch (UnsolicitedNotificationListener listener)

Serializable

java.util. **EventObject**
