Serializable

java.lang. **Class**

Static Methods

```
            Class  forName (String className)
            Class  forName (String name, boolean initialize, ClassLoader loader)
```

Accessors

```
      ClassLoader  getClassLoader ()
          Class[]  getClasses ()
            Class  getComponentType ()
      Constructor  getConstructor (Class[] parameterTypes)
    Constructor[]  getConstructors ()
          Class[]  getDeclaredClasses ()
      Constructor  getDeclaredConstructor (Class[] parameterTypes)
    Constructor[]  getDeclaredConstructors ()
            Field  getDeclaredField (String name)
          Field[]  getDeclaredFields ()
           Method  getDeclaredMethod (String name, Class[] parameterTypes)
         Method[]  getDeclaredMethods ()
            Class  getDeclaringClass ()
            Field  getField (String name)
          Field[]  getFields ()
          Class[]  getInterfaces ()
           Method  getMethod (String name, Class[] parameterTypes)
         Method[]  getMethods ()
              int  getModifiers ()
           String  getName ()
          Package  getPackage ()
 java.security.ProtectionDomain  getProtectionDomain ()
     java.net.URL  getResource (String name)
      InputStream  getResourceAsStream (String name)
         Object[]  getSigners ()
            Class  getSuperclass ()
          boolean  isArray ()
          boolean  isAssignableFrom (Class cls)
          boolean  isInstance (Object obj)
          boolean  isInterface ()
          boolean  isPrimitive ()
```

Object

```
           String  toString ()
```

Other Public Methods

```
          boolean  desiredAssertionStatus ()
           Object  newInstance ()
```

---

java.lang. **Package**

Static Methods

```
          Package  getPackage  (String name)
        Package[]  getPackages  ()
```

Accessors

```
           String  getImplementationTitle ()
           String  getImplementationVendor ()
           String  getImplementationVersion ()
           String  getName ()
           String  getSpecificationTitle ()
           String  getSpecificationVendor ()
           String  getSpecificationVersion ()
          boolean  isCompatibleWith (String desired)
          boolean  isSealed ()
          boolean  isSealed (URL url)
```

Object

```
              int  hashCode ()
           String  toString ()
```
