javax.accessibility.*
Values

Methods declared in supertypes are hidden in subtypes

AccessibleHyperlink

Object getAccessibleActionAnchor(int i)
Object getAccessibleActionObject(int i)
int getEndIndex ()
int getStartIndex ()
boolean isValid ()

AccessibleAction

Accessors
int getAccessibleActionCount()
String getAccessibleActionDescription(int i)
Other Public Methods
boolean doAccessibleAction(int i)

AccessibleIcon

String get / setAccessibleIconDescription()
int getAccessibleIconHeight()
int getAccessibleIconWidth()

AccessibleKeyBinding

java.lang.Object getAccessibleKeyBinding(int i)
int getAccessibleKeyBindingCount()

AccessibleValue

Number get / setCurrentAccessibleValue ()
Number getMaximumAccessibleValue()
Number getMinimumAccessibleValue()
boolean setCurrentAccessibleValue(Number n)

AccessibleSelection

Accessors + Collectors
Accessible getAccessibleSelection(int i)
int getAccessibleSelectionCount()
boolean isAccessibleChildSelected(int i)
void add / removeAccessibleSelection(int i)
Other Public Methods
void clearAccessibleSelection()
void selectAllAccessibleSelection()

AccessibleEditableText

Accessors
String getTextRange (int startIndex,   int endIndex)
void setAttributes (int startIndex,   int endIndex,   AttributeSet as)
void setTextContents (String s)
Collectors
void delete (int startIndex, int endIndex)
void insertTextAtIndex (int index,   String s)
Other Public Methods
void cut (int startIndex,   int endIndex)
void paste (int startIndex)
void replaceText (int startIndex,   int endIndex,   String s)
void selectText (int startIndex,   int endIndex)

AccessibleHypertext

AccessibleHyperlink getLink (int linkIndex)
int getLinkCount ()
int getLinkIndex (int charIndex)

AccessibleText

String getAfterIndex (int part, int index)
String getAtIndex (int part, int index)
String getBeforeIndex (int part, int index)
int getCaretPosition ()
int getCharCount ()
AttributeSet getCharacterAttribute (int i)
Rectangle getCharacterBounds (int i)
int getIndexAtPoint (Point p)
String getSelectedText ()
int getSelectionEnd ()
int getSelectionStart ()

int CHARACTER, WORD, SENTENCE

AccessibleTableModelChange

int getFirstColumn ()
int getFirstRow ()
int getLastColumn ()
int getLastRow ()
int getType ()

int INSERT, UPDATE, DELETE

AccessibleExtendedTable

int getAccessibleColumn (int index)
int getAccessibleIndex (int r, int c)
int getAccessibleRow (int index)

AccessibleTable

Accessible getAccessibleAt(int r, int c)
Accessible get / setAccessibleCaption ()
int getAccessibleColumnCount()
Accessible get / setAccessibleColumnDescription(int c)
int getAccessibleColumnExtentAt(int r, int c)
AccessibleTable get / setAccessibleColumnHeader()
int getAccessibleRowCount()
Accessible get / setAccessibleRowDescription(int r)
int getAccessibleRowExtentAt(int r, int c)
AccessibleTable get / setAccessibleRowHeader()
Accessible get / setAccessibleSummary ()
int[] getSelectedAccessibleColumns()
int[] getSelectedAccessibleRows()
boolean isAccessibleColumnSelected(int c)
boolean isAccessibleRowSelected(int r)
boolean isAccessibleSelected (int r, int c)
