javax.accessibility.*
AccessibleComponent

Methods declared in supertypes are hidden in subtypes

AccessibleComponent

Accessors
Accessible getAccessibleAt (Point p)
Color get / setBackground ()
Rectangle get / setBounds ()
Cursor get / setCursor ()
Font get / setFont ()
FontMetrics getFontMetrics (Font f)
Color get / setForeground ()
Point get / setLocation ()
Point getLocationOnScreen()
Dimension get / setSize ()
boolean is / setEnabled ()
boolean isFocusTraversable ()
boolean isShowing ()
boolean is / setVisible ()
Event Methods
void add / removeFocusListener (FocusListener l)
Other Public Methods
boolean contains (Point p)
void requestFocus ()

AccessibleText

String getAfterIndex (int part, int index)
String getAtIndex (int part, int index)
String getBeforeIndex (int part, int index)
int getCaretPosition ()
int getCharCount ()
AttributeSet getCharacterAttribute(int i)
Rectangle getCharacterBounds (Point p)
int getIndexAtPoint (Point p)
String getSelectedText ()
int getSelectionEnd ()
int getSelectionStart ()

int CHARACTER, WORD, SENTENCE

AccessibleEditableText

Accessors
String getTextRange (int startIndex, int endIndex)
void setAttributes (int startIndex, int endIndex, AttributeSet as)
void setTextContents (String s)
Collectors
void delete (int startIndex, int endIndex)
void insertTextAtIndex (int index, String s)
Other Public Methods
void cut (int startIndex, int endIndex)
void paste (int startIndex)
void replaceText (int startIndex, int endIndex, String s)
void selectText (int startIndex, int endIndex)

CaretListener

void caretUpdate (CaretEvent e)

DocumentListener

void changedUpdate (DocumentEvent e)
void insertUpdate (DocumentEvent e)
void removeUpdate (DocumentEvent e)

AccessibleAction

Accessors
int getAccessibleActionCount()
String getAccessibleActionDescription(int i)
Other Public Methods
boolean doAccessibleAction(int i)

AccessibleExtendedComponent

AccessibleKeyBinding getAccessibleKeyBinding()
String getTitledBorderText()
String getToolTipText ()

javax.swing.**JComponent.AccessibleJComponent**

\# AccessibleJComponent ()

Accessors
Accessible getAccessibleChild(int i)
int getAccessibleChildrenCount()
String getAccessibleDescription()
String getAccessibleName()
AccessibleRole getAccessibleRole ()
AccessibleStateSet getAccessibleStateSet()
\# String getBorderTitle (Border b)
Event Methods
void add / removePropertyChangeListener(PropertyChangeListener listener)

JTextComponent.AccessibleJTextComponent

AccessibleJTextComponent ()
AccessibleAction getAccessibleAction()
AccessibleEditableText getAccessibleEditableText()
AccessibleText getAccessibleText()
