java.security.cert.*
CertStore

Methods declared in supertypes are hidden in subtypes

CollectionCertStoreParameters

CollectionCertStoreParameters ()
CollectionCertStoreParameters (Collection collection)

Accessors
Collection getCollection ()
Object
Object clone ()
String toString ()

LDAPCertStoreParameters

LDAPCertStoreParameters ()
LDAPCertStoreParameters (String serverName)
LDAPCertStoreParameters (String serverName, int port)

Accessors
int getPort ()
String getServerName ()
Object
Object clone ()
String toString ()

Cloneable

CertStoreParameters

Object clone ()

CertStore

CertStore (CertStoreSpi storeSpi, Provider provider, String type, CertStoreParameters params)

Static Methods
String **getDefaultType** ()
CertStore **getInstance** (String type, CertStoreParameters params)
CertStore **getInstance** (String type, CertStoreParameters params, String provider)
CertStore **getInstance** (String type, CertStoreParameters params, Provider provider)
Accessors
Collection getCRLs (CRLSelector selector)
CertStoreParameters getCertStoreParameters ()
Collection getCertificates (CertSelector selector)
Provider getProvider ()
String getType ()
Other Public Methods
Object run ()

CertStoreSpi

CertStoreSpi (CertStoreParameters params)

Collection engineGetCRLs (CRLSelector selector)
Collection engineGetCertificates (CertSelector selector)

CertificateFactory

CertificateFactory (CertificateFactorySpi certFacSpi, Provider provider, String type)

Static Methods
CertificateFactory **getInstance** (String type)
CertificateFactory **getInstance** (String type, String provider)
CertificateFactory **getInstance** (String type, Provider provider)
Accessors
Iterator getCertPathEncodings ()
Provider getProvider ()
String getType ()
Other Public Methods
CRL generateCRL (InputStream inStream)
Collection generateCRLs (InputStream inStream)
CertPath generateCertPath (InputStream inStream)
CertPath generateCertPath (List certificates)
CertPath generateCertPath (InputStream inStream, String encoding)
Certificate generateCertificate (InputStream inStream)
Collection generateCertificates (InputStream inStream)
Object run ()

CertificateFactorySpi

CRL engineGenerateCRL (InputStream inStream)
Collection engineGenerateCRLs (InputStream inStream)
CertPath engineGenerateCertPath (InputStream inStream)
CertPath engineGenerateCertPath (List certificates)
CertPath engineGenerateCertPath (InputStream inStream, String encoding)
Certificate engineGenerateCertificate (InputStream inStream)
Collection engineGenerateCertificates (InputStream inStream)
Iterator engineGetCertPathEncodings ()
