```

📋 FileSystemView

Static Methods
FileSystemView **getFileSystemView** ()

Accessors
File	getChild (File parent, String fileName)
File	getDefaultDirectory ()
File[]	getFiles (File dir, boolean useFileHiding)
File	getHomeDirectory ()
File	getParentDirectory (File dir)
File[]	getRoots ()
String	getSystemDisplayName (File f)
Icon	getSystemIcon (File f)
String	getSystemTypeDescription (File f)
boolean	isComputerNode (File dir)
boolean	isDrive (File dir)
boolean	isFileSystem (File f)
boolean	isFileSystemRoot (File dir)
boolean	isFloppyDrive (File dir)
boolean	isHiddenFile (File f)
boolean	isParent (File folder, File file)
boolean	isRoot (File f)
Boolean	isTraversable (File f)

Other Methods
File	createFileObject (String path)
File	createFileObject (File dir, String filename)
File	createNewFolder (File containingDir) ↳
# File	createFileSystemRoot (File f)

📋 FileView

String	getDescription (File f)
Icon	getIcon (File f)
String	getName (File f)
String	getTypeDescription (File f)
Boolean	isTraversable (File f)

📋 FileFilter

Accessors
String	getDescription ()

Other Public Methods
boolean	accept (File f)

📁 javax.swing. JFileChooser

JFileChooser ()
JFileChooser (String currentDirectoryPath)
JFileChooser (File currentDirectory)
JFileChooser (FileSystemView fsv)
JFileChooser (File currentDirectory, FileSystemView fsv)
JFileChooser (String currentDirectoryPath, FileSystemView fsv)

Accessors
FileFilter	getAcceptAllFileFilter ()
JComponent	get / setAccessory ()
int	get / setApproveButtonMnemonic ()
String	get / setApproveButtonText ()
String	get / setApproveButtonToolTipText ()
FileFilter[]	getChoosableFileFilters ()
boolean	get / setControlButtonsAreShown ()
File	get / setCurrentDirectory ()
String	getDescription (File f)
String	get / setDialogTitle ()
int	get / setDialogType ()
boolean	get / setDragEnabled ()
FileFilter	get / setFileFilter ()
int	get / setFileSelectionMode ()
FileSystemView	get / setFileSystemView ()
FileView	get / setFileView ()
Icon	getIcon (File f)
String	getName (File f)
File	get / setSelectedFile ()
File[]	get / setSelectedFiles ()
String	getTypeDescription (File f)
FileChooserUI	getUI ()
boolean	is / setAcceptAllFileFilterUsed ()
boolean	isDirectorySelectionEnabled ()
boolean	is / setFileHidingEnabled ()
boolean	isFileSelectionEnabled ()
boolean	is / setMultiSelectionEnabled ()
boolean	isTraversable (File f)
void	setApproveButtonMnemonic (char mnemonic)
# void	setup (FileSystemView view)

Collectors
void	addChoosableFileFilter (FileFilter filter)
boolean	removeChoosableFileFilter (FileFilter f)

Event Methods
void	add / removeActionListener (ActionListener l)
# void	fireActionPerformed (String command)
ActionListener[]	getActionListeners ()

Other Methods
boolean	accept (File f)
void	approveSelection ()
void	cancelSelection ()
void	changeToParentDirectory ()
void	ensureFileIsVisible (File f)
void	rescanCurrentDirectory ()
void	resetChoosableFileFilters ()
int	showDialog (Component parent, String approveButtonText) ↳
int	showOpenDialog (Component parent) ↳
int	showSaveDialog (Component parent) ↳
# JDialog	createDialog (Component parent) ↳

int OPEN_DIALOG, SAVE_DIALOG, CUSTOM_DIALOG,
   CANCEL_OPTION, APPROVE_OPTION, ERROR_OPTION,
   FILES_ONLY, DIRECTORIES_ONLY, FILES_AND_DIRECTORIES
String CANCEL_SELECTION, APPROVE_SELECTION,
   APPROVE_BUTTON_TEXT_CHANGED_PROPERTY,
   APPROVE_BUTTON_TOOL_TIP_TEXT_CHANGED_PROPERTY,
   APPROVE_BUTTON_MNEMONIC_CHANGED_PROPERTY,
   CONTROL_BUTTONS_ARE_SHOWN_CHANGED_PROPERTY,
   DIRECTORY_CHANGED_PROPERTY,
   SELECTED_FILE_CHANGED_PROPERTY,
   SELECTED_FILES_CHANGED_PROPERTY,
